SUMMARY

Software developer working across the full stack on web applications, APIs, integrations, and automation for retail operations. Experience with TypeScript/JavaScript, React, Next.js, Node.js, Python, and SQL databases. Pursuing a degree in Computer Engineering at UNIVESP.

PROFESSIONAL EXPERIENCE

Software Engineer

Aug 2025 – Present

AquaFlora AgroShop — Contract

Boa Esperança do Sul, SP, Brazil

- Developed **Stock Sync** in Python to integrate the legacy Athos ERP, which lacks a suitable API, with WooCommerce through structured CSV data, replacing manual export steps with automated price and stock synchronization while preserving manual catalog edits.
- Implemented processing, normalization, and validation of ERP CSV exports to supply data to the API and internal applications, retaining the last valid snapshot when incoming data is corrupted.
- Developed and deployed an internal **Next.js** hub and a **Node.js/Fastify** catalog API with access control and price and stock lookup by name, SKU, and EAN, used daily in business operations.
- Developed and deployed **AquaTV**, a digital signage system with a dashboard, API, and Android TV player, including caching and offline playback on a physical device used in business operations.

Web Developer

Jan 2025 – Aug 2025

AquaFlora AgroShop — Contract

Remote

- Built, maintained, and enhanced the WordPress/WooCommerce online store, with PHP/JavaScript customizations and Python/JavaScript automation for catalog imports and stock and price updates.

SELECTED PROJECTS

Braga Commerce | TypeScript, Next.js, PostgreSQL, Prisma

- Developed an e-commerce platform with a storefront, cart, checkout, and admin dashboard, including server-side price validation, stock reservation, and access control.
- Implemented Mercado Pago integration, webhook validation, and idempotent payment event processing to prevent duplicate effects.

JoysticKnights — Headless Portal | TypeScript, Next.js, React, WordPress

- Developed a Next.js frontend connected to WordPress as an editorial CMS, with server-side routes and a custom integration. Transitioned its publishing architecture to a headless model and continue to manage the portal's technical operations.

Estudos UNIVESP | TypeScript, Next.js, Cloudflare D1, Workers

- Developed a personal study organizer to track courses, assignments, grades, and deadlines, with Cloudflare D1 persistence and deployment on Cloudflare Workers; not officially affiliated with UNIVESP.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL.

Web Development: React, Next.js, Node.js, Express, Fastify.

Data: PostgreSQL, MySQL, Prisma ORM.

Integrations: REST APIs, WooCommerce, webhooks.

Tools and Infrastructure: Git, GitHub, Docker, Linux, Nginx.

EDUCATION AND LANGUAGES

Bachelor's Degree in Computer Engineering

2025 – 2030 (Expected)

Virtual University of the State of São Paulo (UNIVESP)

In progress

Languages: Portuguese: Native | English: Advanced, C1 — EF SET.
